## About Us

AdvantageInk.com specializes in supplying premium compatible inkjet and laser toner cartridges without the premium price tag! We supply inkjet and laser toner cartridges to individuals for home use; any size businesses; corporate accounts; educational entities; non-profit organization; government agencies; health care industry and any others in need of quality cartridges. Our quality products are guaranteed.

## Why Choose AdvantageInk.com

AdvantageInk.com distributes inkjet and laser toner cartridges that are manufactured under the stringent International Organization for Standardization (ISO) 9001/9002 standards. We offer quality fully guaranteed products because customer satisfaction is one of our most important goal. We provide cartridges with savings up to 55% less than that of the name brands. We also distribute Original Equipment Manufacturer (OEM) brand names at a lower price compared to major retail outlets. Let AdvantageInk.com be your #1 source for all your inkjet and laser toner cartridges needs.

## Frequently Asked Questions (FAQ)

**Q.** Why use premium compatible remanufactured cartridges?

**A.** Remanufactured cartridges can save you up to 55% off the cost of OEM cartridges. We guarantee that the quality of our remanufactured inkjet and laser toner cartridges will match or exceed OEM cartridges.

**Q.** How are premium compatible cartridges manufactured?

**A.** Remanufacturing process involves disassembling, cleaning, replacing appropriate components, refilling ink or toner, print testing and repackaging. All premium compatible remanufactured cartridges meet or exceed the printing page yields and quality standards of OEM cartridges. OEM cartridges made by HP, Canon, Lexmark, Apple, or other original manufacturers are usually manufactured using a combination of new and recycled parts at factories throughout the world. For example, on the box of an HP C4127X you can read: "*This newly manufactured product may contain parts and materials recovered from the HP Planet Partners recycling program*" and on the box of a Canon FX-4: "*This cartridge may contain reconditioned parts and remolded materials.*"

**Q.** Do you sell refilled cartridges?

**A.** No. We do not sell refilled cartridges. All our cartridges are remanufactured. Although some people still think of them as the same, there is a big difference between remanufactured and refilled cartridges. A refilled cartridge has been drilled out and refilled with new ink or toner which is also known as "drill-n-fill" method. The "drill-n-fill" method does not involve disassembling, cleaning, replacing appropriate components and post-testing to ensure 100% guaranteed quality.

**Q.** Can a printer manufacturer void my equipment warranty for using a remanufactured cartridge?

**A.** No. Equipment manufacturers cannot void warranty of your equipment or service contract for using remanufactured cartridges. Current Laws prohibit any manufacturer from requiring you to buy their product exclusively. Here is what Hewlett Packard (HP) warranty says: "*For HP printer products, the use of a non-HP ink cartridge or a refilled ink cartridge does not affect either the warranty to the customer or any HP support contract with the customer.*"

**Q.** Are you overpaying for ink?

**A.** A recent (March 2009) Eastman Kodak ad stated "*Last year America paid \$5 billion too much for inkjet-printer ink.*" Another Eastman Kodak television ad likens ink to oil. "*The world's most expensive liquid isn't found in the Middle East. It is found in inkjet-printer cartridges.*" The same overpaying analogy could be used for toner cartridges. Compare our guaranteed compatible inkjet and/or laser toner cartridges pricing versus OEM pricing and answer the question - are you overpaying for ink?
